

## Perigee GPS Fleet Tracking System Buyers Guide

### How Can GPS Tracking Help Your Company?

#### By reducing fleet expenses –

Effective utilization of the Perigee GPS fleet tracking system will help reduce your fleet expenses by:

- Cutting fuel costs due to reduction of engine idling
- Reducing overtime with improved employee oversight and reduction of off-route driving
- Extending vehicle life with more efficient maintenance planning and tracking
- Reducing the man-hours needed to manage fleet operations procedures

#### By optimizing customer service processes which increase customer retention rates -

- Improve your customer billing procedures and accuracy by analyzing arrival and departure times
- Cut response times by validating fastest route to the customer and dispatch closest drivers to the next stop

#### By providing a scalable system that can grow with your company –

- Many additional features, such as Remote Driver ID, Electronic Driver Logs, Dispatch & Routing and remote temperature monitoring can be easily added

#### Find your vehicles using the latest Google maps

### Have you asked your GPS fleet tracking vendor these questions yet?

- **Is your hardware made in the USA?**  
Yes – Reltima’s SmartAntenna tracking device is made right here in Woburn, MA.
- **Is your software easy to use?**  
Yes - our Perigee tracking software is known for its user-friendliness and many cost cutting features.
- **What kind of fleet cost savings can I expect?**  
Our customers typically see monthly fleet expense savings in the 10 – 30% range.
- **Can your tracking device be updated over-the-air?** Yes – our SmartAntenna is equipped to be easily updated with the latest firmware upgrades.
- **What reports and tools do you have available to help reduce fleet costs?** We have a full suite of reports to analyze historical and current data, an alert module for tracking vehicle activity and driver habits, an intuitive Landmark creation system (see map above with red highlighted area) and a maintenance planning tool that automatically alerts you when service is due.

### Use these intuitive system features to streamline your fleet operations –

- ▶ Use Google maps to check your vehicle’s position
- ▶ Use vehicle alerts including violating “Posted Speed Limit”
- ▶ Track vehicle maintenance by Miles, Days or Engine Hours
- ▶ Receive alerts for upcoming maintenance due
- ▶ Start/Stop Detail, Fleet Performance and Idle reports
- ▶ Email reports for automatic delivery
- ▶ Find closest vehicle to any address
- ▶ See historical route replay
